Dear Ms. Diaz Bravo,

I am pleased to inform you that *Cultivos Tropicales* has been accepted for indexing in the AGRICOLA database. AGRICOLA ([agricola.nal.usda.gov](http://agricola.nal.usda.gov)) contains over 5 million citations to the literature of agriculture and allied subjects, and is used worldwide by researchers, agriculturalists and others.

Please be aware that we recently reengineered our indexing processes, having migrating from manual to automatic indexing. Last year we installed an automatic indexing system and since then have been "training" it to work more effectively with agricultural terminology. The short-term result is a significant backlog of journal articles to be indexed.

It will be a while before *Cultivos Tropicales* is indexed and appears in AGRICOLA, but we will index every article that you provide us with metadata.

We look forward to indexing *Cultivos Tropicales*

Sincerely,

Michael D. Esman
